Castoldi, Luigi.
ON THE DISTRIBUTION OF EXTINCTION TIMES IN BIOLOGICAL DESCENTS. [1962] 11p. 3 refs.
Order from SLA $1.60 62-20228

Trans. of Unione Matematica Italiana, Bollettino, 1956, ser. 3, v. 11, p. 158-167.

DESCRIPTORS: Distribution, *Evolution, Survival, *Animals, Probability, *Mathematical prediction.

The behaviour of the average number of generation for extinction ("Average time of extinction") of the male offsprings from a progenitor is determined with respect to the mean value m of the distribution of the number of offsprings in the first generation. An attempt is made to prove that such an average time is finite for $m < 1$, and infinite for $m \geq 1$. The same alternatives hold for the variance and for the successive moments of the number of generations for extinction. (Author) (Biological Sciences, TT, v. 9, no. 9)
